Education

Sinhgad Institute of Technology and Science

Bachelor of Technology (B.Tech) in Electronics and Telecommunication – CGPA: 7.23

Pune, Maharashtra

2024 – Present (Expected 2027)

Government Polytechnic

Diploma in Computer Science – Percentage: 80.13

Pune, Maharashtra

2021 – 2024

Technical Skills

Programming Languages: C, C++, Java, JavaScript (DSA in C++)

Web Development: HTML, CSS, JavaScript, Node.js, React.js, Tailwind CSS, MongoDB, SQL, Express.js

DevOps / Tools: Docker, Git, GitHub, Postman

Technologies: REST APIs, Socket.IO

Experience

Python Developer Intern

Jun 2023 – Aug 2023

AIS Solutions Pvt. Ltd.

Pune, India

- Built a job recommendation system using supervised machine learning models, improving job-to-candidate matching accuracy. Performed data preprocessing on multiple candidate profiles, including missing value handling, to enhance model robustness.
- Applied label encoding and vectorization on 50+ skill features and optimized train-test split strategies to reduce data bias.
- Benchmarked five machine learning algorithms, improving accuracy from 74% to 83.65%, and selected the optimal model based on performance metrics.
- Automated model evaluation using Precision, Recall, and F1-score, enabling faster performance reporting and scalable insights.

Projects

Quizifyr – AI Quiz Generator

- Built an NLP-powered quiz generation system that extracts key content from PDFs/DOCX, generating quizzes in under 10 seconds per document.
- Implemented keyword extraction and text summarization techniques to generate context-aware and relevant quiz questions.
- Developed a scalable Flask backend processing 500+ documents with OCR support to improve accessibility for scanned files. Enhanced user engagement by 40% by introducing difficulty levels, question randomization, and topic-based filtering.
- Integrated secure file handling and validation to ensure data privacy and prevent malicious uploads.

APERA – AI-Powered Chat and Video Call App

- Developed real-time messaging and video calling features using WebRTC and Socket.IO, enabling low-latency peer-to-peer communication.
- Designed and integrated an ML-based emotion analysis system to enhance user engagement through sentiment-aware interactions.
- Implemented end-to-end encryption and role-based authentication, reducing security vulnerabilities by 30%. Built a scalable Node.js backend supporting 200+ concurrent users with Firebase real-time synchronization.
- Optimized React components and state management to improve UI responsiveness by 45%, increasing user session duration.

Achievements

Achieved Top Rank among 800+ teams in a national hackathon organized by PCCOE.

Solved 150+ algorithmic problems on LeetCode, strengthening problem-solving skills and competitive programming expertise.
